This IPS is intended to be a summary of an investment philosophy and the procedures that provide guidance for the Committee and the Board. The investment policies described in this IPS should be dynamic. These policies should reflect the Committee’s current status and philosophy regarding the investment of the Portfolio. These policies will be reviewed and revised periodically to ensure they adequately reflect any changes related to the Portfolio, to the Committee or the capital markets.

It is understood that there can be no guarantee about the attainment of the goals or investment objectives outlined herein.

INTRODUCTION

One of the important purposes of this IPS is to establish a clear understanding as to the investment goals, objectives and management policies applicable to the Foundation’s investment portfolio (“Portfolio”).

There is no single authorized decision maker; all decisions are made by the Board. The Committee’s primary activity is to monitor and report to the Board and to make recommendations.

Assets to be considered under this IPS

The investments being managed under this IPS have a current approximate value of \$498,364 as of calendar year end 2009.

The projected outlook for the Foundation's financial situation:

- ❖ Stable over the next one-year period.
- ❖ Moderately Positive over the next five years.
- ❖ Positive over the next ten years.

The Committee's expectation as it regards inflation is:

- ❖ Over the next year it will increase.
- ❖ Over the next five years it will increase.
- ❖ Over the next ten years it will moderate.

INVESTMENT OBJECTIVES

The investment objectives addressed in this IPS represent the Foundation's overall investment objectives.

The Foundation's objective for this investment portfolio is principal protection with a moderate emphasis on income-generating investments as well as growth of capital.

The long-term objective for the assets under this policy is to achieve a 5% nominal annualized return after fees and expenses.

TIME HORIZON

The Foundation's long term objectives for this portfolio are currently anticipated to continue for a ten (10) year time horizon. The Board reserves the right to modify these objectives at any time.

SPENDING POLICY

Goal of Foundation

The Board believes that grants to be made in the future are as important as grants made today. This is consistent with the philosophy that this Foundation is to exist in perpetuity,

and therefore, should provide for grant making in perpetuity. To attain this goal, the overriding objective is to maintain corpus of the Foundation for giving and attaining the target Rate of Return.

Attitude toward Gifts

Future giving (contributions) is unpredictable.

Spending Policy/Distributions Amount

The Foundation supports the objectives of CLC by making periodic transfers of funds to CLC.

Endowment restrictions as acknowledged by the Board in agreement with donors will be managed in compliance with the accepted restrictions. As of fiscal year end 2010 there are two endowments managed by the Foundation that have restrictions as to the use of corpus and requirements as to use of the earnings as defined in the respective endowment agreements. Detail regarding the restrictions are included in the respective agreements.

Funds generated from the QuaLife Endowment Fund and donated to CLC by the Foundation will be made with the restriction that the funds can only be used by CLC to support service grants. When donations are made with these funds, CLC will acknowledge the source of the funds to the recipient. Funds from the General Endowment Fund can be used for either service or research grants. Calculation for donation will be made as follows:

- At the end of each calendar year the Board will determine the investment earnings for that year on QuaLife Endowment Fund(s). This is defined as income from dividends and interest less expenses of managing said fund. The Foundation typically transfers to CLC fifty percent (50.0%) of the earnings of said fund with a statement as to the amount that must be allocated to service grants.
- At the same time or later in the fiscal year, the Board will review earnings of the General Endowment Fund using the same formula with a statement as to amount to be allocated to service and/or research grants.
- Greater allocation amounts may be authorized by the Foundation Board when necessary and/or appropriate.

The Foundation may allocate to CLC up to fifty percent (50.0%) of any calendar year Capital Gains in the corpus of the General Endowment Fund. This allocation can be any amount to the extent that the value of the corpus at the end of the prior year was greater than the total amount invested at the time the allocation was approved. A larger allocation may be authorized by the Board when necessary and/or appropriate. No similar allocation from the QuaLife Endowment Fund is permitted.

The spending of the Foundation may change from time to time at the direction of the Board.

TAX POLICY

Foundation is a Colorado non-profit 501(c)(3) charity; therefore, there are no income tax considerations with regard to the assets held in the Foundation's account(s).

RISK TOLERANCE

Investment theory and historical capital market return data suggest that, over long periods of time, there is a relationship between the level of investment risk assumed and the level of return that can be expected. In general, in order to attain higher returns one must accept higher risk, e.g. volatility of return.

Given this relationship between risk and return, a fundamental step in determining the investment policy for the Portfolio is the determination of the amount of risk the Board can tolerate.

A comfort level with investment risk influences how aggressively or conservatively a portfolio can be invested. Like a scale, risk needs to be balanced with the need for returns to achieve the investment goals. The Board desires long-term investment performance sufficient to meet its objectives. The Board understands that to achieve such performance the portfolio may experience periods of decline. The Board further understands that in a severe market, the potential recovery period could be long extended.

ASSET ALLOCATION

Academic research offers considerable evidence that the asset allocation decision far outweighs security selection and market timing in its impact on portfolio variability and performance. After reviewing the long-term performance and risk characteristics of various asset classes and balancing the risk and rewards of market behavior, the following asset classes were selected to achieve the objectives of the Board:

Asset Class	Minimum	Maximum	Preferred
US Equities – Large Cap	20%	50%	30%
US Equities – Small Cap	0	15%	10%
International Investments	10%	20%	15%
US/International Bonds	25%	100%	30%
Alternative Investments	0	20%	15%

Maximum allowable allocation of the aggregate portfolio to equities is 75%
Maximum allowable allocation of the aggregate portfolio to illiquid securities is 0%.

Portfolio Returns and Volatility

The Board's willingness to accept risk and their expectation for investment growth have a direct bearing on the rate of return objective for this portfolio.

It should be recognized that the portfolio will invest in a variety of securities and that the actual weighting of these securities can and will vary. It is also important to note that future returns of the securities with the portfolio and the portfolio itself can be expected to vary from the historical returns.

The portfolio's historical rate of return is not a guarantee of future investment returns, nor an indication of expectation regarding future results. Future returns could differ significantly and capital loss is possible. This IPS shall not be construed as offering a guarantee.

Updated Allocations

Over time, it may be desirable to amend the basic allocation. When such changes are made, updates will be considered part of this IPS and will be approved by Resolution of Board as allowed in its Bylaws.

FREQUENCY OF IPS REVIEW

The Board recognizes that all investments go through cycles and, therefore, there will be periods of time in which the investment objectives are not met or when specific managers fail to meet their expected performance expectations. The Board accepts the principle that, in the absence of specific circumstances requiring immediate action, patience and a longer-term perspective will be employed when evaluating investment performance.

The Advisor and Committee will meet at least annually to review and recommend modifications as applicable to IPS.

LIQUIDITY

Investor's liquidity requirements are none; there are: no minimum liquidity needs as cash is handled separately.
